Sustainable Development Goals

In September 2015, at a historic UN summit, world leaders adopted a set of goals to end poverty, protect the planet, and ensure prosperity for all as part of a new sustainable development agenda.

The SDSN Northern Europe is hosted by Gothenburg Centre for Sustainable Development at Chalmers University of Technology and the University of Gothenburg, Sweden.
We’re SDSN Northern Europe

A network that links knowledge to action for society’s achievement of the Sustainable Development Goals.

Connected and Committed to Sustainable Development
To achieve a sustainable society, we need change, and change requires knowledge. We at SDSN Northern Europe connect Nordic knowledge institutions to communicate what sustainability is all about and promote joint learning and sustainable solutions.

SDSN Northern Europe was launched in February 2016 in Gothenburg, Sweden as a national and regional network aimed to support the achievement of the Sustainable Development Goals (SDGs). We are part of the global SDSN, which works closely with UN agencies, multilateral financing institutions, the private sector, and civil society.

For a sustainable future
The 17 Sustainable Development Goals (SDGs) of the 2030 Agenda for Sustainable Development comprise one of the most important tools to secure a sustainable future. Over the coming years, with these goals that universally apply to all, actors will mobilize efforts to end all forms of poverty, fight inequalities and tackle climate change, while ensuring that no one is left behind.
