Sustainable Development Solutions Network
Northern Europe

From Knowledge to Action for the Sustainable Development Goals
We’re SDSN Northern Europe

A network that links knowledge to action for society’s achievement of the Sustainable Development Goals.

Connected for sustainable development
Moving towards a sustainable society needs change, and change requires knowledge. SDSN Northern Europe is a regional network of more than 50 Nordic knowledge institutions. We are part of the global SDSN with over 1 200 member institutions in more than 100 countries.

Members in SDSN Northern Europe identify and fill knowledge gaps, provide high-quality education for sustainable development, and provide advice and solutions for a transformation to a sustainable society.

Our actions
Together, we create methods, tools, projects, and events to achieve action, and provide each other with support, feedback, insights, resources, and information to succeed.
Global goals for sustainable development
The 17 Sustainable Development Goals of the 2030 Agenda for Sustainable Development is one of the most important frameworks to secure a sustainable future. These goals apply to everyone globally and aim to leave no one behind. We all need to increase our efforts for people, planet, prosperity, peace and partnerships.

The Sustainable Development Report
The report summarizes countries’ current performance and trends on the 17 Global goals. Learn more at www.sdgindex.org
We offer a free online tool for learning about the Sustainable Development Goals (SDGs) and supporting improved strategic actions. The tool visualizes the results from a self-assessment of how an activity, organisation or innovation affects the SDGs.

www.sdgimpacttool.org
The SDSN Northern Europe is hosted by the Gothenburg Centre for Sustainable Development at Chalmers University of Technology and the University of Gothenburg, Sweden.
